

1.1.3 Requirements Analysis - Product

Group: _____

Date: _____

PART I:

Product:

1. What is your operational environment (users, locations, times, & conditions)?

2. What function(s) does the product perform? *What* does the product do?

3. What are the performance metrics/specifications? *How* will characteristics and features of the product satisfy the users?

4. What are your performance criteria? To what degree (measurement) does your product perform its functions?

PART II.

Take the information you have gathered in Part I and fill in the **Four-Box** for your product. Make sure to identify the **Operational Environment, Specifications, Functions, and Performance Criteria.**
